

SmolLM2-135M CPT · four passes · 20% replay

— Ordinary AdamW: four LR's — Trajectory K=64 — K=8 terminal diagnostic ★ Ordinary LR1e-5, step1536

512 previously examined documents per domain; one training seed. Whiskers: 95% paired-document intervals (5,000 draws).
Selection and training-seed uncertainty are not included. Small exploratory signal; denser ordinary controls and independent confirmation still required.
